CAREER OBJECTIVE

To continue to experiment, learn and engender creative solutions to challenging problems.

Interested in productizations of ideas and building excellence around Netsuite and related domains using Automation, Continuous Deployment/Integration and frameworks. I can also work on developing solutions for non Netsuite products and have very good development and programming skills in cloud, Devops and integration domains

EMPLOYMENT

Senior Consultant at Deloitte Cloud Practice (November 2013 – Till Date)

- Being part Implementation/Product teams, my work revolves around leading and solving client problems that range from end to end implementations for O2C/P2P/Reconciliation cycles. I also have fair bit of experience with integrations using Mulesoft/JAVA/XML/SOAP/JavaScript/REST and Netsuite.
Also involved in ideation to product delivery of interesting concepts around Netsuite. Worked on SuiteScripts/SuiteCloud/SDF and have built many reusable tools that can reduce the time of implementation and help developers reduce effort
 - **Automation**
 - CI/CD pipelines for Netsuite [SDF CLI/Jenkins/Git] [\[blog here\]](#)
 - Automation of unit testing for SuiteScript 2.0 [\[link here\]](#)
 - **Integrations**
 - Good with Openair integrations [Mulesoft and Native Openair]
 - Integrated Netsuite with systems like Zendesk/Coupa/Anaplan/Salesforce/Zoura using Mule or Native NetSuite Apis
 - **Reusable Tools**
 - Comparator tools for cross Netsuite account object comparison
 - Intelligent Subsidiary Import tool to create subsidiaries automatically
 - **Eminence/Strategy**
 - Best Practice and Coding standards
 - Heavily involved with the adoption of SDF on projects through eclipse or cli
 - Worked on strategy assignments and build frameworks to asses and improve the overall performance of Netsuite accounts
 - Whitepapers: RESTlet vs SuiteTalk, Adoption of SDF and automation for Netsuite

Clients Include: AMEX, HPE, Google, LoJack, Microfocus, CSOD, Mitchell

Certifications: Netsuite Foundation Certified[\[Certification Number: 13408\]](#)

Cloud Product Engineer at Celigo India (November 2012 – November 2013)

- Worked on the Salesforce connector integrating workflows with Netsuite [implemented new flows which were real time syncing objects from Salesforce to NetSuite and vice-versa]
- Completed the whole product from development to bug fixes and release issues.Worked on Netsuite Integration with Google Apps[syncing the google tasks API with Netsuite]

Software Engineer at Progress Software India (June 2011 - November 2012)

- Build Tools and plugins for Eclipse (SONIC ESB)
- Developed and optimized the Build System for SONIC shifting it too PDE builds improving the build time by 20%.

Intern at Progress Software India(Summer of 2010, 3 months)

- Worked on integrating solution that integrated SAVVION with the Android platform .
- Implemented communication through MQTT using push based communications for mobile cell phone.

SKILL SET

Java(Advanced), Netsuite(Advanced), JSP(Moderate) , XML(Moderate), MuleSoft, Javascript(Medium), Eclipse(Advanced),Android(Moderate),Salesforce(Basic) , Openair ,Shell Scripts(Basic), Git.

ADDITIONAL EXPERIENCE and AWARDS

- Spot Awarded for the Sonic Build system in 8.6 (August – December 2011) [\[link here\]](#)
- I am a frequent programmer on Project Euler/Leetcode/Hackerank [\[link here\]](#)
- Applauded for my work with Netsuite and scalability at Deloitte
